WORK EXPERIENCE

Ecolab

Jun. 2020 – Aug. 2020

Digital Engineering Intern

St. Paul, MN

- Designed and built REST APIs using MuleSoft to connect Salesforce apps with databases.
- Developed extensive unit testing and error handling of APIs.
- Published design process documentation and presented project results to business leaders.

Rockwell Automation

May 2019 – Dec. 2019

Software Engineering Co-op

Cleveland, OH

- Developed code and testing for both the front end and back end of a new integrated development environment (IDE), using a variety of technologies including TypeScript, Git, GraphQL, Xtext, and HTML.
- Attended technical workshops and learning events to strengthen skills as a developer.
- Presented work in the form of live demos.

Shared Power Network

Oct. 2019 – Nov. 2019

Software Developer

Columbus, OH

- Developed an interactive webpage that grabs and displays live data of solar panels based on user behavior, complete with search bar functionality.
- Technologies used include JavaScript, jQuery, Bootstrap, and HTML.

EDUCATION

The Ohio State University

Aug. 2016 - May 2021

BS, Computer Science & Engineering

Columbus, OH

- GPA: 3.43.
- Minor in Political Science.
- Vice President, The Italian Club; general member, Design Develop Deploy Club.

PROJECTS

Ecolab Hackathon (1st place)

Jul. 2020

- Worked on a team of four to develop a food inspection analysis tool that connects restaurants that have failed a city inspection with Ecolab's sanitation or pest service department, depending on the violation.
- Used Microsoft Azure tools to incorporate machine learning, visualizations, and a notification system into the project.

Legend of Zelda (1986 NES) Game Recreation

Jan. 2020 - May 2020

- Worked on a team of six to develop the Legend of Zelda video game from scratch using C# and Monogame.
- Final version of the game had perfect functionality, with some enhancements not included in the original game.
